

Data Case Study A

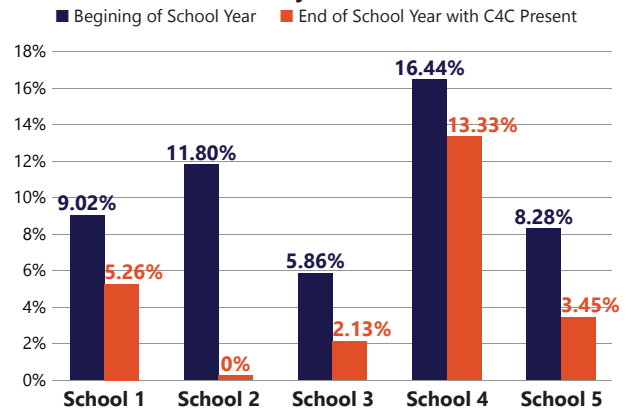

In alignment with the acquisition and amassing of success stories, Coaching4Change has produced quantitative case studies definitively proving C4C's influence and effectiveness

C4C Partner District Case Study

In one school district, College Mentors concentrated on Math and English skills throughout the 2024 academic year. In all schools, both Math and English failure rates declined. Simultaneously, suspension rates were reduced, and positive behavior in the classroom increased.

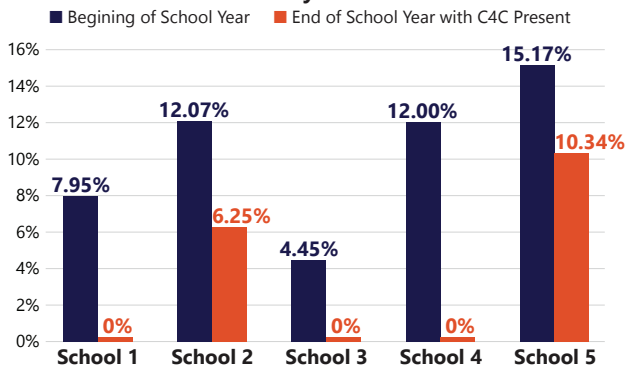

The English Failure graph demonstrates the remarkable results of C4C College Mentor interventions. Overall, C4C College Mentors contributed to **an average 63% decrease in English failures** across this school district. In School 2, C4C programming completely eliminated English failures. One factor that increases C4C effectiveness is the recruitment of multilingual College Mentors who innately understand the challenges of learning to read and write English and can, therefore, provide both academic and emotional support for struggling students.

2024 School District Case Study: ENGLISH FAILURE PERCENTAGE

One factor that increases C4C effectiveness is the recruitment of multilingual College Mentors who innately understand the challenges of learning to read and write English and can, therefore, provide both academic and emotional support for struggling students.

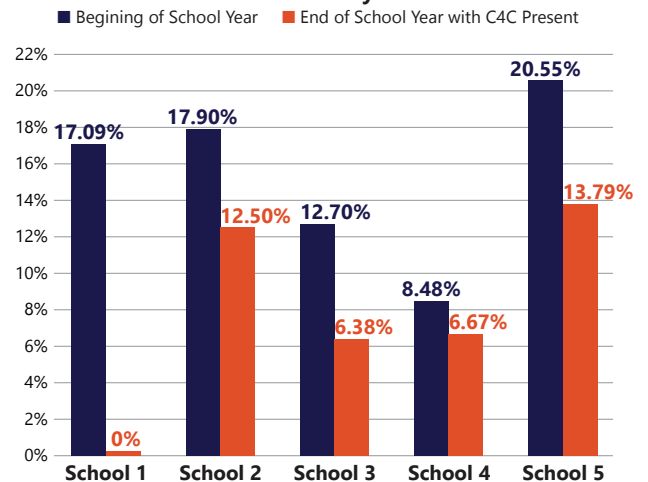

2024 School District Case Study: MATH FAILURE PERCENTAGE

Analyzing the impact of C4C at School 1 specifically demonstrates outstanding results. Suspensions were eliminated, and **chronic absenteeism rates were reduced by 80%**. With fewer behavioral distractions, English failure rates dropped by 42%, and Math failure rates declined to 0%. These outcomes indicate the impact of C4C programming and College Mentor interventions. Aggregated, these powerful and positive changes improve student engagement and empower K-12 students to graduate high school and pursue higher education.

In the same Case Study, Math Failures were eradicated in three schools. C4C College Mentors contributed to **an average 74% decrease in Math failures** across this partner school district.

2024 School District Case Study: SUSPENSION RATE

As more impact data on K-12 students becomes available, Coaching4Change looks forward to sharing both aggregate and detailed analyses of its transformation impact on the lives of vulnerable youth.
